PROTECT PEACH TREES FROM WORM LARVAE.

(By Donald McCluer.)

The moth that produces the peach tree borer will make her appearance during the next two or three weeks. As soon as the mature moth is developed she will start to lay her eggs for the coming generation. These eggs are laid on the trunk of the tree just above the ground. As soon as the eggs hatch which will be about ten days, the young larvae look for cracks in the bark of the tree where they can start to work. The presence of the borers is very easily detected by the gummy frass gathering at the base of the tree.

After the borers get a start in the tree there is no way to stop them but to cut in the tree and get out the worm (Larvae). However they can be largely prevented by mounding up the dirt around the base of the tree in the early part of the summer, and by painting the tree trunks with a poisoned whitewash. The poisoned whitewash is made by adding one (1) pint of crude Carbolic acid to ten gallons of ordinary lime white-wash. If the trees are thoroughly painted at the base with this an the dirt will mound up around the base of the trees there will be little danger from these insects.

WATCHAMA COLUMN.

The peanut is the tramp of the nut family.

It gets into little wagons on street corners and whistles for the crossing all day long.

It travels with circuses, hibernates in the secret reaches of country grocery stores, finds its way into salad on the old home table.

It is a restless, wandering, ne'er-do-well that roams the world over looking for somebody to eat it.

You'd never catch a walnut doing that.

(BY UNITED PRESS)

Rio De Janeiro, July 3.—The American Chamber of Commerce is "on the job." Believing that the actual introduction of American made goods into the Brazilian market and the establishment of Brazilian goods in the American market works to the practical strengthening of trade relations between the two countries better than orator and after dinner compliments, the American Chamber in this city has effected an agreement with the Commercial League of Brazil for the exchange and disposition of the products of both countries.

By the terms of the agreement the American Chamber proposes to find agents or buyers for all products offered to the American markets by members or through the Commercial League of Brazil. In return the League promises to provide the same outlet for American goods for which

there is a demand in the Brazil will work through their memberships and affiliations in their reian markets. Both organizations spective countries.

An American manufacturer or exporter desiring to place his goods in Brazil may do so through the American Chamber who will furnish the necessary information as to procedure and methods, and by the co-operation of the Commercial league, will arrange agents and merchants to handle the goods.

SAYS DRINK WATER IF YOU WISH TO GROW FAT AND PLUMP THIN MEN AND WOMEN

Do You Want to Get Fat and Be Strong?

The trouble with most thin folks who wish to gain weight is that they insist on drugging their stomach or stuffing it with greasy foods: rubbing on useless "flesh creams," or following some foolish hysicians culture stunt, while the real cause of thinness goes untouched. You cannot get fat until your digestive tract properly assimilates the food you eat. Drink a glass of cold water four or five times a day and take the following preparation known to reliable druggists almost everywhere, which seemingly embodies the missing elements needed by the digestive organs to help them convert food into rich, fat-laden blood. This preparation is called tonoline, and much remarkable testimony is given as to its successful use in flesh building. Tonoline which comes in the form of a small non-injurious tablet, taken at meals and mixed with the digesting food, tends to prepare fat, flesh and muscle building elements so that the blood can readily accept and carry them to the starved portion of the body. You can readily picture the transformation that additional and previously lacking flesh making material should bring to your cheeks, filling out hollows about your neck, shoulders and bust disappearing, and your taking on from 15 to 30 pounds of solid healthy flesh. Tonoline is harmless, inexpensive efficient. E. T. Whitehead & Co., have it and are authorized to refund your money if weight increase is not obtained as per the guarantee found in each large package.

Caution:—tonoline is recommended only as a flesh builder and while excellent results in cases of nervous incare should be taken about using it unless a gain of weight is desired.

CHOLERA MORBUS

This is a very painful and dangerous disease. In almost every neighborhood someone has died from it before medicine could be obtained or a physician summoned. The right way is to have a bottle of Chamberlain's Colic and Diarrhoea Remedy in the house so as to be prepared for it. Mrs. Charles Eycart, Huntington, Ind., writes: "During the summer of 1911 two of my children were taken sick with cholera morbus. I used Chamberlain's Colic and Diarrhoea Remedy and it gave them immediate relief."

LEMON MAKE SKIN WHITE, SOFT, CLEAR

Make This Beauty Lotion for a Few Cents and See for Yourself.

What girl or woman hasn't heard of lemon juice to remove complexion blemishes; to whiten the skin and to 'bring out the roses, the freshness and the hidden beauty? But lemon juice alone is acid, therefore irritating, and should be mixed with orchard white this way. Strain through a fine cloth the juice of two fresh lemons into a bottle containing about three ounces of orchard white, then shake well and you have a whole quarter pint of skin and complexion lotion at about the cost one usually pays for a small jar or ordinary cold cream. Be sure to strain the lemon juice so no pulp gets into the bottle, then this lotion will remain pure and fresh for month. When applied daily to the face, neck, arms and hands it should help to bleach, clear, smoothen and beautify the skin.

Any druggist will supply three ounces or orchard white at very little cost and the grocer has the lemons.

HAULING TAX.

It has come to my notice that there are a number of men from out of town who do hauling into town for pay, or for contracts, who heretofore have paid no privilege tax to the town, and probably they have never been asked for payment of any tax, but, as the question is one of right and fairness, these men, even though they live outside the town limits, who do hauling into town, should like the town man, who pays the tax, also pay a like tax, and much tax is now overdue.

In view of the fact that these men have not given the matter any previous consideration the time limit for the payment of this hauling privilege tax will be extended, to those who have not heretofore been notified, for ten days, by July 10 all must be paid or the penalty will be enforced.

Get the Habit of Drinking Hot Water Before Breakfast

Says we can't look or feel right with the system full of poisons.

Millions of folks bathe internally now instead of loading their system with drugs. "What's an inside bath?" you say. Well, it is guaranteed to perform miracles if you could believe these hot water enthusiasts.

There are vast numbers of men and women who, immediately upon arising in the morning, drink a glass of real hot water with a teaspoonful of limestone phosphate in it. This is a very excellent health measure. It is intended to flush the stomach, liver, kidneys and the thirty feet of intestines of the previous day's waste, sour bile and indigestible material left over in the body which if not eliminated every day, become food for the millions of bacteria which infect the bowels, the quick result is poisons and toxins which are then absorbed into the blood causing headache, bilious attacks, foul breath, bad taste, colds, stomach trouble, kidney misery, sleeplessness, impure blood and all sorts of ailments.

People who feel good one day and badly the next, but who simply can not get feeling right are urged to obtain a quarter pound of limestone phosphate at the drug store. This will cost very little but is sufficient to make anyone a real crank on the subject of internal sanitation.

Just as soap and hot water act on the skin, cleansing, sweetening and freshening, so limestone phosphate and hot water act on the stomach, liver, kidneys and bowels. It is vastly more important to bathe on the inside than on the outside, because the skin pores do not absorb impurities into the blood, while the bowel pores do.
